DETAILED ACTION

1. This office action, in response to the amendment filed 2/26/2003, is a non-final office action.

Response to Arguments

2. The information disclosure statement has been filed 2/26/2003 has received. However, no translation of the references listed in the IDS has been provided though a translation for each reference is indicated on PTO form 1449. The references have been cited in a pervious search report but it there is no concise explanation of the relevance of each reference. The IDS has been place in the application file but the references have not been considered.

3. Applicant's arguments filed 2/26/2003 have been fully considered but they are not persuasive. Additional clarification is provided below in the rejections of the claims.

Information Disclosure Statement

4. The information disclosure statement filed 2/26/2003 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in

Art Unit: 2631

the English language. It has been placed in the application file, but the information referred to therein has not been considered.

5. The information disclosure statement filed 12/13/1998 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but a number of the references have not been considered.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under treaty defined in section 351 (a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 13-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Thoone (US 5,603,108).

Regarding claims 13, 14, 16, 23 and 24, Thoone discloses a method and apparatus for receiving geographically selected digitally coded transmissions. A control section for a radio receiver receives and decodes information transmitted in coded form

Art Unit: 2631

in a Radio Data System (RDS) in a Traffic Message Channel (TMC) (abstract). The control section has an area and storage keys. These keys provide access to information about selected areas (abstract). The area key offers information which is relevant to the area in which the receiver is located (column 2, lines 1-15). The radio is tuned to a FM station transmitting the traffic information and the traffic information is stored in the receiver (column 2, lines 65-67). There are several possibilities of determining the area in which the radio receiver is located. The radio receiver is capable of comparing the field strengths of received stations with the field strengths of stored stations to determine the location of the receiver (column 3, lines 25-43). In this case, the selection information is the transmission itself.

Regarding claims 15 and 18-22, the transmitting station will transmit at different field strengths and alternative frequencies. Using this information, the location of the receiver is determined (column 3, lines 25-43).

Regarding claim 17, Thoone also discloses transmitting information concerning regional public transport and park and ride facilities (column 2, lines 58-62).
